

**Do you think the school should continue to use a hybrid schedule? Why or why not?  
(FULL RESPONSES)**

Yes then we can still get in school help while keeping all parties safe

I don't really care.

I think the school should either continue hybrid since that is now what everybody is getting used to or go fully online.

Yes, I think hybrid schedule should continue. Why I think this is because it is personally easier for me and I think less bullying happens.

They should not use hybrid because it is more confusing than either going fully back or fully online. Tyrone had three options and they picked the worst one. Also, students are not as worried about it as you think.

No, I do not think that we should continue to use a hybrid schedule. Although I appreciate being able to sleep in more on the days I don't have school, I believe it would be beneficial for all students to return to school. This will increase productivity and social interaction which is extremely important at this age.

No I think that they should end the hybrid schedule because it is harder to access the teachers when help is needed and would make it easier if it was in person everyday.

No, the hybrid schedule has made me less productive even though it is nice to have one or two days off/online days I am better off returning to a 5 day schedule

yes, it gives students a break from having to wear masks all day, and if students struggle with time in school, they have all day for work if they are home

I think we should go full time because there are people that are saying that if they keep doing this they will fail

I think we should stay hybrid because it is working very well for me. I get my work done at a reasonable time and can work ahead if I please.

Yes, because so far its working well and its been keeping everyone safe, if we go back full time itâ€™s not just students and teachers we have to worry about getting sick itâ€™s also there families that they could bring it home to, where someone could be high risk

No cuz ppl are failing

I'm not really sure I would be fine if we stayed hybrid or went full time as long as we don't get rising cases then I am fine with either.

No , regular school is easier and it helps my grades stay higher .

I am getting used to the hybrid scheduling now, and am doing much better than at the beginning of the school year. I have finally figured out how to make this work for me and I am happy with where I am. I think we should continue it until Christmas. If we go in full time we will probably have to get rid of the ten minute mask breaks, which are a life saver throughout the day. The idea of going back now is stressful because I will have to go through the learning process all over again of adapting to a new schedule, one that took me so long to master.

I think the school should determine what the safest option is and go from that.

No because I have heard from many students that this hybrid stuff is so much harder to learn because there is many distractions at home and there is no motivation at home to do school work so in my opinion we should go back to school completely.

Yes because half of the kids can stay home and come into school.

No because I want to go back full time.

Yes I do think we should continue because opening up with this many cases will just be pointless because we will ether return to hybrid or have to shut down all the way

No because almost all kids are having problems with it.

I don't know

Yes.

no because everyone wants to see their friends and return to normalcy

No because teachers give way to much work on off days and then kids can't ask questions when they are confused

I think we should continue using a hybrid schedule because i feel as though if we open back up to everyone 5 days then we are going to get a case of covid and get shut down to all online which is way worse than hybrid.

I think that we should either all come back full time with masks or do hybrid without the masks. I don't see anything wrong with hybrid right now. I kinda feel like it's probably not the smartest idea but I'm fine with either.

yes, it is a lot safer.

I feel they should not. Though some students do enjoy it, most would prefer either full online or full in person (I believe). I do agree that it is more safe in that aspect, but I don't feel like it's benefiting students. Our school has more students not doing work and not doing well now than before because of this.

Yes and no cause I think it's going good but I also would benefit from in person full time

I don't know

honestly dont know

"No because its really hard to remember what day were in and out or an alternative

A Day:Monday and Tuesday in school home Thursday and Friday

A & B Day: home Wednesday

B Day:In Thursday, Friday HOME Monday,Tuesday"

No because not everyone has good internet and its hard to keep up on days where you are home.

We should go back to full in-school learning. Many people want to go back to normal. So far, nobody has gotten sick, so it wouldn't hurt to go back full time. Masks could still be worn to help prevent the virus.

Yes. I, personally, don't believe going full-time in person is safe. I enjoy having smaller class sizes with hybrid and still have the ability to socialize. I can continue talking to my teachers to get help, and I don't feel as overwhelmed as I did when entering full-virtual learning in the spring.

Yes because it makes it easier for students to do their work and still have time in the day for other activities

No we shouldnt because some students (me being one of them) with weakened immune systems cant fight COVID as well as others if someone in our class gets it

yes because the virus is a very bad thing and even tough it sucks we need to continue our precautions

Yes because i'm very scared to get the virus or take it home and us all going together could increase the risks dramatically. Especially with some students not wearing masks properly already. I feel we need masks and the hybrid schedule.

I do not think the school should continue to use hybrid because I am not learning to my best abilities. I feel as if its not about learning at this point its about meeting deadlines to see if I am going to get a 0.

NO I think that we should all go back to full online I think that this is the safest way for schools to interact without having to worry about covid 19

no because i emailed my teacher about work and where i could find it and she emailed me back a week later and it can cause many missing assignments and lates and my grades will go down because my teacher didnt reply until a week later

I think so because we just had a covid case in the district and I don't think it's a good idea to move forward especially now.

NO, students who care for their grades and are taking specific classes toward their careers are not getting their full education, this is downgrading their GPA and their grades and when they want to go to college this schedule will be the result of down graded grades because you do not have the hands on time to learn my grades in the math subject were the best my sophomore year and now they are down the drain because i cannot learn by gmm telling me got the problem wrong, in class we are guided and taught how to do the problem and sitting at home on out chrome books with a red dot in front of our faces is not teaching us what we did wrong that red dot is not teaching us and guiding use how to do it correctly the teachers are who guide us from right from wrong through working out the math problem. and sitting on the computer 8 hours a is quite painful to the eyes, headaches migraines the stress of looking at the four F on our grades degrading students making them feel like the have not done good enough in a days time statistics and information collected show that in person training(which is another way of learning ) people have analyzed opinionated information explaining that in person training or learning is significantly better because you are doing it you are learning visually how the specific task is being done and in person learning or training pertains to all class subjects even learning on a computer people who author this opinion of in person training/ learning state live chats, emails, texting, and other online communication DO NOT OFFER THE SAME LEARNING INTERACTION as in person learning does.

Yes, It makes more sleep beneficial and NOT sleeping in lass and missing directions  
Yeah because it gives us more time

Yes, in the overall picture of things at the moment, I think that the hybrid schedule is a great plan for keeping families safe and at ease. It is working well for me personally, so I don't see much harm in an altered schedule.

yes, it works so far. plus with the recent covid case in the elementary it might be safer.

No, because I like to build relationships with my teachers and it is difficult to do that with online/virtual days.

No. All online was actually better than both everyday school and hybrid. Everything was online, so forgetting assignments was a lot harder when everything was on the same platform. Sleep was easier to find, I could work at my own pace, but was still able to get it done, and instructions for assignments were a lot more clear

I think the school should either continue using the hybrid schedule or move to full online instruction. I personally don't think people should go to school with fear that they might get Covid-19 and spread it to their families. It's better to stay safe and miss out on a year of "regular" high school experience than to risk the lives of vulnerable individuals with health issues. Yes, wearing masks help a lot but it won't 100% stop the spread.

No, I think we should go fully virtual because we wouldn't be at any risk of going to school and because if we go fully virtual we will be able to be more organized with our work. We don't even listen to the rules currently with hybrid, including teachers. It is impossible for us to stay 6ft apart and the masks that we wear do not fully protect us from covid.

Yes they should because not all the people would be there even with the hybrid schedule I feel like it's still crowded in the hallways

Yes

i think that most kids are struggling and would like to go back to normal

No, because I feel like everyone would do so much better in school if it goes back to full time. A lot of students have a hard time focusing when it comes to online work.

Yes they should because we cannot social distance and if we go full time we might as well remove the mask but why are we going back when the cases are going up in the school district I mean for me I'd rather want full time so I don't have to worry about all these online assignments and due dates that aren't there or whatever or when u turn something in and the teacher says it's not there and it's rely is but either ways fine i guess  
Yes, because I think that classrooms are ready for 20-30 kids in a class. To specify, I don't think we are that far over with COVID.

Yes and No, I think the hybrid schedule is beneficial for me but I also want everything to go back to normal.

I think it should considering a lot of teachers will leave if we go full time and it puts the students at more risk because closer quarters and we are going into flu and cold season. So keeping students on hybrid would be the better option for now for the safety of students and staff. Going full time will put everyone at a higher risk especially considering the seasons were in.

Yes because if you send all the kids back then we are all going to get sick

Yes, because a lot of kids love it and they enjoy it and it's so much better than the normal 5 days

Yes, coming back all at once will be super overwhelming

No because it makes it difficult to learn anything on the days we are off

I think we should continue the hybrid schedule because for some students it makes it easier and allows them to have more time to work on assignments.

no, i can learn and know all the work that is due and have the same due dates as other students I think they should continue the hybrid schedule because kids are still going to school and getting an education while being able to social distance and be safer than if we were to all go back at once. It's letting teachers stay in their job while feeling as safe as they can right now.

No, I think if we all use safety precautions we will be okay. We are going to have cases, everyone knows that, but it is how we respond to those cases that is important. Quarantine and contact tracing help.

Yes, I believe the school should continue the hybrid schedule. Due to the season, the flu should be right around the corner. This is when most people get sick in a regular year. Why would we go back now? The precautions for Covid are going to be harder to control due to the amount of students. And it just doesn't feel safe for the students, staff, and families for us to go full in school.

In my personal experience, the hybrid schedule is working. I know this is not the case for everyone. The ineligibility list is longer than ever because students think an online day is a day off.

yes, as of October 7, 2020 the elementary who currently does go full time already has had a positive case of Covid-19 therefore imagine an even bigger school that being the high school with bigger crowds in the hallways, classrooms, lunchroom, etc. i feel that there will be no way

of proper social distancing if all students are required to go full time. Putting each other at risk is the last thing we should want to do and i strongly feel that one case is one too many.

Yes. It is the more obvious and practical for the world we are currently living in. Having us split up allows for more room to move if the high school would end up with a case, just as we saw happen in the elementary. I am a senior and I want to have the best senior what possible, and while it isnt ideal to only be there half a week with half of my friends, it is necessary. Without the hybrid, we will end up completely online within a couple weeks (its FLU season. We will ALL have symptoms and have to get sent home and tested. Then what?) and it will be a total disaster and grades/school work will suffer. Nobody will have motivation and nobody will learn.

No because it puts students behind on learning

I think they should continue it because if we go full in person now because students are struggling, if we get a bunch of more cases during the normal flu and COVID-19 season and go full online, then these students will do even worse than they are now. The hybrid schedule is also giving us more personal time with our teachers because there are less of us.

Yes, because I think if we come back, full time, COVID-19 may spread faster than if we would've stayed with hybrid for a couple more months.

No. Hybrid learning is not learning at all. All Ive been taught this year is when to turn in assignments I barely know how to do. Im not learning anything except how to meet deadlines.

I think the school should most definitely continue using the hybrid schedule. Many students have adapted to this already and I know if we go back full time, many students will be stressed because they haven't had full 5 day weeks since March. It will take them a while to adapt and many will be very stressed. Hybrid also allows students to still be in the school environment for part of the week and then at home for the other part. Any student I have talked to said how much they enjoy have the weekdays and weekends to do their school work. They enjoy being able to have "extended" weekends and like being able to do their work whenever they want over that course of time. The hybrid schedule has also led to my friends and me having higher grades. Yes, there is a concern of a lot of students being ineligible, but all they just have to do their virtual work, and they will be fine. If they aren't doing their virtual work and we go back full time, they are probably not going to do their actual work either. The school should continue using hybrid because students are comfortable and enjoying this method. Switching up the schedule at this point will make students stressed and more anxious. There is a good chance they will be uncomfortable in class too because they have been used to small classes of 8-13, not full classes of close to 30 people.

No. I dont. It sucks. If we had school 5 days a week I would go

No. I am a really good student in school, I have a good home life, and I have lots of friends and it's still hard on me. I'm at the top of my class and even I have little motivation to do my school work.

No

No because you can't ask teachers questions because they take HOURS to answer.

Yes. People are getting more, much needed sleep.

Yes, I think we should at least wait until January to figure out how everything goes. Plus many people have gotten use to hybrid.

I think if the full time schedule fails then we should go back to hybrid instead of immediately going all virtual

yea, its easier

yep

Yes. It is much easier to be in smaller classes

Yes, because all of the change is confusing and hard on students.

Yes, because it gives me more time to get work done. I work right after school on weekdays, the last thing I want to do after work is school work. So, I have the whole entire day to complete or at least start my homework before I go to work with the hybrid schedule. I have way more time to study, therefore I'm getting better grades on tests/quizzes

No, because it is not safe to do it that way.

yes because when I'm in school full time I have no time to do anything because I have practice after school and that takes a while and it's like 10 by the time its all over

Yes, because I am used to it now and it's not a good time to go back.

No, I think we should all go back full time because it is a struggle to work from home with the attention spans some people have. I personally focus more in school, and I have more motivation there too.

Yes because its much better than coming back full time and risking kids getting covid and its more suitable for people to do hybrid.

yes because I have finally gotten used to a schedule and the change so going back full time would require me to readjust again which takes a while to do

No its a terrible idea and has been

It might reduce our risk of covid, but I still despise online learning.

Balanced work and play time

no, students arent learning as much as they need to be. if the hybrid schedule continues the school needs a better way to be teaching students on off days.

I think in certain cases like snow days, the hybrid will be useful but if it is safe to attend all five days, I think we should take advantage of it.

Yes. If the school board decides to go back full time, it is apparent that they value the opinions of the parents over the safety of the students.

Yes I do, it just seems safer that way

No because it's less functional

I think they should continue with hybrid until they know that there is no chance of a covid outbreak at the school. The students and safety of the staff should always be the #1 priority, even if learning is a tad but harder sometimes. If we go back to school full time and there is a massive outbreak within our school, then we will all be forced to return to full time online learning anyways. Also, as far as I know, the teachers were told that they would receive cleaning supplies for their classrooms as part of the schools covid plan. Although all of the classrooms I go into have hand sanitizer, all of the teachers had to buy it themselves, which is not something the teachers should be forced to do themselves. The school should provide hand sanitizer. Also, I remember hearing that the teachers were going to wipe down the desks between classes, but they were only given one bottle of cleaner to do so. Many teachers don't even wipe off the surfaces in their classrooms because they don't have the time to do so. This has always made me feel anxious about contracting covid because there was someone sitting in that desk three minutes before I was and if they coughed or sneezed on the desk then I could contract the virus and bring it home to my family, most of whom are high risk. Also, there are lots of times when teachers aren't watching kids and masks are taken off. As a teen, most feel uncomfortable to say that they are uncomfortable with this in fear that they will be made fun of. I have even had teachers who had them around their chin or not covering their nose come up to my desk to hand me papers or answer a question. If there is staff who don't even follow mask rules, how can we expect them to enforce the rules towards the students? Lastly, some of my classes are packed as full as they can go with still maintaining social distance. Where are we going to put all of the kids if we all come back together?

No

Yea, its probably just best

Yes its nice to be able to get the break you just have to stay up on your work itâ€™s not that hard

I feel like the school should continue to do hybrid and then try going back full time after winter break. My reasoning behind this is a lot of kids are going to be getting the flu. But since so many flu symptoms are also Covid symptoms they will be getting tested for Covid as well. Which will be causing a lot of kids to miss school. And there will be a larger amount of kids forced to be absent if someone does have the Covid. Because if we go back full-time each class is going to be losing at least 20 kids per class. But now itâ€™s like 10 or 11 kids. So I think we should wait until after flu season then try going back at full capacity.

It would make sense for the school to stop using the hybrid schedule since many students are struggling with the virtual work.

Yes because when we are in the classroom it leaves more one on one attention to the student and the teacher rather than a classroom full of 20 students.

No because with hybrid, we aren't able to work as well like we are when we are all there.

No I don't think so because the hybrid schedule is very difficult for me and all of my peers.

No because virtual education is nothing compared to in person education

Yes, because most students have gotten used to it.

No, the teachers cram everything in on one day and its hard to keep up.

I think that it is the safest option to stay hybrid at the moment

We shouldn't since some kids get confused from the scheduling and plus some kids haven't been showing to school on the days when they should and can't achieve their academic abilities

No, I think we should go fully remote. There have been cases in the Elementary school. This virus is dangerous and we need to be taking precautions.

Either stay all five days or stay hybrid don't change it back and forth

Yes I do believe the school should use hybrid to an extent. With the increase in cases at the school it may be more safe to continue to use the hybrid schedule.

Yes, I'm currently enrolled in the schools co-op work program and on the days I have off of school I get to work more hours and I love it

no, i know many other students including me who absolutely hate online school. it's more difficult.

No, I think that this experiment has done its job. Though a kid in the elementary did get COVID he didn't get it from the school. If the school continues to take precaution with larger classes I believe that it will all be good in the end.

no because its difficult

No because I think that either way people are going to get the virus and we need to be careful, but that doesn't mean we need to stop living our lives. We need to go back to in person and get an education.

YES we should stay hybrid, it is safer for all students and that greatly outweighs the whiney parents/students. Sorry but if we go full time there will be a surge and students will get sick same with teachers, parents, grandparents. I can't conclessly live with the fear of I might be asymptomatic and be contributing to the issue.

I think it would be good for students that are struggling with school and for the kids that have depression or other problems with mental health because it can make sure that they aren't tumbling into a rabbit hole like alot of people did during quartine.

Yes they should becuse they should consider the older famliiy memebers children have. Also flu season is coming up.

I think the school should go back full time, but when flu season hits go back to the hybrid method

yes

"Yes because we get a break

Yes, because the virus isn't slowing down

Should we, probably so no one gets sick. Do I want us to, no cause I wanna come back full time and I'm young I'll survive.

Yes absolutely. Especially with cases from Tyrone are just coming out! There's no need to risk going back to a 5 day schedule.

yes

yes because it seems easier to be able to do your online work at any time of the day. And you still get your face to face education.

yes because some students like the hybrid method but it should be optional and that the school use all three options. ( hybrid, full time, or online)

yes with flu season coming around I'm afraid that if we go back full time then someone with the flu will go to school and them getting sent home and quartered because they are exerting symptoms but it is just the flu.

Yes because we are putting students at risk bringing them all back full time and lets actually prepare students for college by setting up a schedule like this instead of pretending that college is just like high school.

Yes I think we should stay in hybrid because I have seen a few schools that started out full time and now look at them they are switching back to remote learning. So why mess everything we have going now just to ruin this to put us on remote learning. And if you think about it the hybrid schedule is ACTUALLY helping this school out since the whole entire school isnt here and it gives the custodians time to sanitize the building

no in person learning is way better

yes I think they should continue to use hybrid and that if enough people want to go full time give the option to go full time but whoever wants to stay hybrid can.

negative ghost rider. I want my senior year to be somewhat normal in this time full of inconsistency

I think it should be changed to everyday because it makes it easier to focus in school and get work done. If not then hybrid is fine

no because i dont like it

yes because its safer

yes because the spread will go crazy

Yes, I think they should continue the hybrid schedule. Moving to a full time schedule would only move us to an online schedule faster. I don't think it is safe enough as it is, so to eliminate social distancing would only make it worse. I also think that many students struggled with online

due to the lack of contact with teachers. However, the hybrid gives us this beneficial asset. I fear that when we go back online these students would struggle yet again, and I would hate to see this so early on in the year. So, essentially, moving to full time would only worsen our health thus resulting in an online schedule. I think the hybrid is a happy balance between the two, and it is a safer option.

no, i think all student have had contact with each other at sme point so there is no point of separating us into two groups

No, the hybrid is nice to be able to sleep in on some days, but there are many disadvantages. A hybrid schedule for Tyrone and my CTC classes is completely opposite and I have to stress every day to make sure I am on the right day. It is also unfair for us students to only be getting half a school year of education when we were told to be coming to school for a school year's worth of education. The students are being taken advantage of the school year by using this hybrid schedule. I personally need the in-class instruction because I do not have a degree in education and I need to be taught my lessons. The hybrid schedule is also not consistent like the CTC. Every other Wednesday makes no sense. That is not consistent. At the CTC they use their odd day as a cleaning day because we still are living in a pandemic so our Wednesday should be used to clean the school if anything instead of trying to make things confusing. Not having a consistent schedule is not healthy and can be stressful to other students as well. If some students believe that the hybrid or even cyber schedule is better for them, then why don't they just use it instead of dragging everyone else into failing? If I had the choice to be hybrid or be in-person I would gladly be in-person, but some people do not like coming in-person so we should just have them do hybrid or online. We should be given a choice on how we learn. No because I rather be doing school work at school

No go fully online we have a case at our school. I don't know if I am going to go know I that, I want to keep my family and myself safe from COVID.

No because kids aren't getting their work done and it's been lowering their grades  
Yes, To decrease the chances of Covid-19 spreading

yes because its alot easier for a kid to get one on one help in a class of 10 vs a class of 20  
no it just dosent feel right

Yes because if we go full-time again it could cause a spreading of corona in our school, which would lead to a shut down.

yes because it is safer, less stressful for students, and has allowed my grades to rise.

No, its harder for no reason
