

**What are some of the pros and cons of the hybrid schedule?  
(FULL RESPONSES)**

Definitely it makes it harder since we have so many more assignments and harder to grasp the lessons but it keeps everyone safe

I mean I feel like I'm not really learning that much. All we really do at home is review or read out of a book.

pros - some is online cons- harder to balance between online and regular

"A pro is that the teachers can concentrate on you more in class because there are less students. A con is when you message a teacher they don't get back to you right away, but that is because they also have a class in school."

"Pros - You Get a "Break" for Two Days

Cons - Disorganized

No face to face learning

Difficult

Confusing

Flat out bad

"Pros: the stress of waking up and going to school everyday is decreased tremendously.  
Cons: doing online worksheets, and then coming to school just to take tests it very difficult because it feels as we are barely being taught in the classrooms. "

you can work on things at your own pace.

"Pros:

I can work on my virtual work whenever I want, as long as it is done by the due date.

The work is a little easy.

Cons:

It is difficult to catch up when you miss a day.

It is harder to get a hold of teachers for help."

"Pros- the students and teachers are safer this way

I have more time outside of school to catch up on work and can learn at my own pace

Cons- its not the same as learning in person and always having help "

Pros: we can do our work on our own time Cons: none of us are learning we just go by assignments due by 11:59 Sunday night

"We can do things at our own pace.

We can work ahead if we are allowed to.

I feel like there is not as much homework to do."

cons - its harder

"Being at home allows me to work at my own pace and practice self discipline that I know will be helpful for when i go to college. Sometimes I run into silly little problems that I wish I could ask a teacher quickly about instead of going through the trouble of writing an email and waiting for a reply. Plus, our in-school days are draining. I am getting used to it now and am making it work for me.

Being at home is great in the sense that I can go out throughout the day and live life normally rather than school school school. I like being in control of my schedule and I think it is a great growth opportunity for me."

The cons are you are not getting as much in person learning. The pros is you can do school work when you want to not a set schedule.

Being at school and getting bullied

I'm only at school two or three days a week which is good in some ways, but I don't get to see all my friends and it's hard to learn online.

You don't have to wake up everyday, and you get more of a mental break, but you also have to force yourself to do the work

Pros: I work at my own pace. Cons: I have trouble doing it because of my environment, I get very stressed and depressed when I'm home, I skip work and it's harder to understand what to do, It has lowered my grades.

less crowding(pro)

"Getting in class learning with proper help

the stress

Pros are you get in school instruction but not have to be confined to masks and distance of all day

"pro - getting good rest on off days/personal time management  
con - not a true schedule/not seeing the entirety of our group of peers"

"pros- extra sleep, less people in the school, work at own pace during the online days  
cons- can't see most of my friends, sometimes there is too much work and if the teachers are teaching group b then I can't get any help."

"Pros-

1. Smaller classes
2. Can take mask breaks

Cons-

1. Get lost on where I'm at for school
2. Can't always get help right away
3. Hard for me to understand on cyber

You don't get to see everyone, and it's annoying having to go from in person to online but it's good having a somewhat break.

The hybrid is working so far and it is so much safer than everyone going back at once. Personally, the hybrid schedule does not work for me. The only pro there is for me is that I get to see family I don't see often because they are home on the same days as I am. The cons are I just can't focus at home at all. If I sat and did all my work it would probably only take me an hour, but personally I can't do that.

"Pros: you still get to go to school sometimes, you can sleep in longer on days you have online school

Cons: you don't get to see everybody, it can be hard to learn online"

N/A

"cons- not getting one on one time with teacher  
pro- not having to get ready everyday "

It's nice to be at home on days that I wouldn't normally get home until late at night during school. But, at the same time, adjusting between the different schedules is super stressful

"cons: it's really hard to remember the schedule most of the time

the masks make it hard to talk and for walking all around the school

pros:i get to sleep a little later if needed on cyber days"

Pros: Get to stay home for at least 2 days sometimes 3

Cons: My grades are slipping"

Pros: more time to do work, teachers can help more people in school due to less students

Cons: less motivated to do work, less help from teachers"

I enjoy that the hybrid schedule gives me the opportunity to work at my own pace for some of the week. I also like the fact that I don't feel as drained as I normally do after 5 in person days. However, with the virtual learning, I often find myself teaching myself many difficult concepts, which can lead to high stress.

Pros: Easier not having to get up every day really early, less stress

Cons: Not seeing friends"

"Pros: seeing friends more And in class help

Cons:barley any mask breaks

Con - Chance of exposure "

pro-is that you get more time to work on what you want to work con-procrastinators don't get anything done because it is so easy not to do"

Only pros if i am being honest it just works better with multiple different things for me the only kind of meh thing is the virtual stuff but its not bad at all

"pros-

I get to sleep in till 9

I eat all day

Classes are less noisy

Cons-

Cant learn

Grades are dropping

Struggling to stay focused

More stressed about not knowing what 2 do"

"pro I think one pro is that we can directly talk to the teacher and not have to wait for a email

cons all of the things that we do can be done online. teachers can easily spread covid-19 due to the fact that the face shield can still let particles be spread ""Veltman says. If the person remains coughing and talking with you for 30 minutes, then the face shield blocks 68%"".

another con that I think is a bad one is the mask break this is awful I have made it the whole day and not taking one mask break and I have been able to breathe perfectly. these mask break are just ridiculous and unnecessary "

Pros- safer, less risk with fewer people.

the only pro there is to this hybrid schedule is limiting the exposure risk, but there had been more cons with me than pros. my grades are slipping down the drain, there are students who need to learn in person and there students who can learn on virtual learning i am not one of those students who learns virtually in am a very hands on person i need to be able to ask for help because online work such as GMM is not teaching us anything, we do the problem and we are not guided through what we did wrong and then students are left to wrestle with the question for hours until they feel like giving up on the question. THIS SCHEDULE DOES NOT WORK FOR ALL STUDENTS, STUDENTS ARE NOT GETTING THEIR FULL EDUCATION AND THIS HURTS THE STUDENTS WHO ARE WORKING THEIR HARDEST AND ACTUALLY CARE ABOUT THEIR GRADES!!!!!!!

More Sleep, NOT sleeping during class

Not as stressful

This could potentially slow the spread of COVID-19 incase of an outbreak. On the same hand, we may not be learning as much because we are not in school for the time usually allotted for the school year.

pros, teens get to sleep in a little longer plus the work isn't to troubling. con: you don't have a teacher with you to help teach and learn

"Pro, before I was on everyday, I had a healthy sleep schedule.

Cons, the work is harder to keep track of (Even on everyday), good internet is a gamble."

Pros I get my work done

i am not motivated to do the online work because there is no teacher helping me

We shouldn't be in school at all according to the RECENT COVID CASES

I would much rather go to school full time with all of the students together. Online makes things a little more difficult for me.

A pro is that its much easier to learn with fewer students and we are helping prevent the spread

Pros I dont have to wake up as much cons sucks for assignments and teachers not answering emails

"Pros- having 2-3 days at home,  
Cons- having a lot of online work "

"pros- get to be home for more than 2 days a week, quiet and easier to focus at home  
cons- not being able to see everyone everyday "

It keeps everyone safe and enforces social distancing. Con i dont get to see friends but i can do that outside of school

I like I can get my work done when I want

You donâ€™t have a high risk of getting the virus

Cons: you donâ€™t get to see all of your friends and the days you are off make it harder to learn

N/A

lots of assignments i am not aware of, very confusing

"Pros: I get a break some days, it's easier on me to only have to go to school a few days a week, I feel safer only going half a week.

Cons: I dont get to see some of my friends, if iâ€™m confused on certain things I have to email.  
"

Hybrid days allow for more free time. Not only that, but it makes things easier when it comes to transportation and gas money.

I feel that it is preparing me for college. I take exams on the days that I come in and do my work on the days off. It was difficult at first to establish a schedule, but it has forced me to improve my time management skills. My grades have improved from low As to high As because I can get more one on one attention from the teacher with the hybrid schedule.

The hybrid schedule gives me insight on what it will be like to have to not procrastinate and to get work done once iâ€™m in college.

Pros: not going to school everyday cons: not being able to learn everyday and having to figure things out on my own

The pros are we learn so much more half in school half out of school. I have twice as much free time to study for tests and get work done. If kids apply themselves and try to do the work teachers give them, they will see that they are giving us more time. Also, I have retained information so much better this way and I think others would too if they just treated it like a normal school day. Some cons are teachers do not get instructional time to teach on certain

days of the week. I talked to a few people and they think that if we did zoom during our off days during our class period, then we will still get the lessons. And if kids cannot attend the zoom, they can be recorded so that would help solve the teaching problem.

"Pro- It seems to be slowing the spread of COVID-19  
Con- Less face to face instruction with teachers. "

There are no pros. Cons include little to no social interaction, lackluster learning, and risk of being exposed to COVID-19. Remote learning will do us no good in the aspect of learning; however, it will keep us safe. Full-time might bring my grades up, but is risky to the health of the students.

For me personally, my grades have gone up and I am doing very well with hybrid. I still get to learn in school for part of the week, and I enjoy my days off where I can complete the work at my own pace. I still get to be in the school environment for part of the week but I greatly enjoy being able to have two weekdays and my weekend to complete my hybrid work. The only con I have is that I don't ever see the B-day people, but most of my friends are A-day so it doesn't fully affect me.

Pros would be I sleep in two or three days a week. Cons, I dont get to see half of my friends I liked being able to sleep in on the hybrid schedule, but I have to be honest with you, the school part of hybrid school is terrible. I have to learn all my lessons outside of school and then come to school and take tests on things I taught myself. Iâ€™m not a fan. Plus, I miss seeing all my classmates everyday.

We get up wake up later but itâ€™s harder to learn and get motivated

pros- none; cons- the teachers PILE on work and expect us to work on weekends  
Sleeping in(pro) but not understanding canvas assignments(con)

"pros- I can work at my own pace, I can sleep in longer, I can get ahead in work to make sure I have everything done

cons- Hard to learn, turn in date confusing, not good with motivation"

"pros: at least some in school/hands on instruction

cons: less hands on instruction"

pro: easier to do the online, easier to learn

"Cons: everything is different, no motivation for cyber work, not seeing everyone.

Pros: not seeing everyone is also kinda nice, finally got used to it, safer with covid about to be at its peak."

"PROS- 1) there's less students in the classroom, giving us the advantage of social distancing so we can have mask breaks 2) teachers can have more one on one time with students if they're struggling in class because there is less students 3) LESS GERMS 4) students have more free time/time to work on virtual assignments

CONS- 1) LAZY kids are failing. "

"Pros- students can sleep in two-three days a week

Cons- every teacher has different turn in dates and methods making it confusing."

pro is that its safe when you are home. Cons is that it is not safe to be in the school .  
some pros are we are online most days and in school some days and i get to see my friends but  
the cons are nothing

Less stress at school. I can relax and do work at my own pace.

The only thing that is good about the cyber days is you get to sleep in a bit.

"pros- my virtual days are less stressful and i feel more rested due to attendance time and come in contact with less students

cons- in school days are mostly tests"

Its a joke too much work

Its nice to get a break, but virtual schooling is so boring and I'm worried it's detrimental to my mental health.

only pro is not getting up early five days a week

It allowed more free time and let me sleep in. While I got more sleep, it was harder for me to focus when I wasnt in school.

"Pros: safety, flexibility, cheating is managed

Cons: none "

The hybrid schedule is good because it gives us time at home to the work done we need to do and have some downtime to relax

There are no pros other than me getting an extra 2 hours of sleep other than than that everything has been worse especially my grades they have dropped so much.

The pros are getting to work at home for half of the week which gives me a break form the stress of being in school. The work is not extremely difficult on virtual days and most teachers are very understanding when you have internet issues or didn't understand the content. The classes are less crowded which think not only reduced the risk of getting covid, but also crates

less anxiety that some find in social situations. The only cons would be that if you do need more immediate help on an assignment, teachers are not always readily available because they are teaching in person classes. Also, it can be hard to wake up on time to sign in on virtual days and to do your assignments instead of procrastinating.

Pros- get to sleep in Cons- hard to focus and learn on virtual days

Makes weeks go by faster, but at the same time my grades  
Less chance of getting covid

I like the hybrid schedule because it really allows me to work at my own pace. The only con is making sure I have everything turned in right on time

"P) Able to complete assignments on your own time while online  
P) Can work in a comfortable environment with little distractions at home.  
"

"Pro - Seeing friends and engaging with more activity. Also, teachers will be able to attend students easily.

Con - Worse grades. Slow teacher help. "

Cons are that it's making me not want to do my assignments and ruins my sleep schedule and makes me really not want to go to school.

It's hard to be motivated to do school work at home

"Pros- More free time, don't have to wear a mask everyday

Cons- Don't get to see friends "

Con: Hard to get on a normal sleeping schedule Pro: would be all day to work on something  
All teachers post work in different ways so it is hard to tell what all you have to do on virtual days

Pros are kids are safe yes but cons are some kids aren't doing their best and are already forgetting to turn in work and forgetting to come to school

It makes it harder to learn the material, but safety is the top priority.

Online work is absolutely awful and I will not participate in online work

Pro: less students in classroom and school at one time. Con: Hard to stay focused when at home

"pros: sleeping in, not having to come everyday, more time to work on assignments  
cons: harder, more self-taught "

pro: are you get to work at your own pace con: questions are harder to get through to teachers and there are distractions at home

"Pros: less conjunction in the hallways and less busy classes.

Cons: If a teacher misses one day that is a lost opportunity to ask a question on an assignment, some teachers aren't fully aquamated to the schedual yet, and you dont get to see some friends."

Homework is hard and sometimes don't understand it

Some cons are that I am not getting instruction everyday and don't have a resource readily available if I have a question or need an explanation.

We aren't sleep deprived, we can get all our work done early and have the rest of the day to work unlike school all day, we have to stay until 3.

"Pro's- its safer, i may not like it however at the end of the day we're less likely to spread it. Cons- people are complaining and it's annoying. Also online isn't as benifital to me however I've been doing alright "

If you miss a day you grades goes down to a C or D and it can be hard to contact a teacher because if they aren't there the days you are, it's kinda hard to take a test on paper or get the work that isn't on canvas.

I don't see many cons at least in my classes

I like that most work is submitted online it is makes it harder to lose my papers. wearing masks in school sucks but we have to do it.

Pros I get to stay at home, and if I want to go one vacation I can go and still do my online work. Nothing

More time to work and cool off from school.

Con-full price parking pass to park here half the time. Con-I can't focus at home.

Pros are that social distancing is achievable the cons are that the canvas cite is not simple to navigate.

The days you are off you can spend time with your family and friends. You can also get your work done at whatever time you want.

"pros

\* not getting corona

cons

- \* i have less class time
- \* i have to email my teacher about everything
- \* i get distracted easily while working at home "

hybrid allows students to get more one on one time with teachers making them more confident in their abilities and allowing their grades to go up because they are better when they have more one on one time allowing them to buffer out what problems the kids have.  
 "Pro- more realistic to how college works

Less stressful  
 More motivated to work

Con- Teachers don't have a great idea how to work Canvas "

I like it because it gives us students a break from coming in. It's not like we are just sitting at home playing video games because we have to do cyber before

i only have cons i never can find my work

it is less stress to be at school everyday and I prefer to not have to be at school for the whole week .

The only pro is that I can sleep in for the days I'm off. But all the cons are my sleep schedule is trash, I have no motivation to actually do my school work, I just sit at my house and watch Netflix, I'm just cheating on all my school work, everyone that is has an off day is hanging out together anyway, I'm just using photo math, and we are teaching ourselves what the teachers should be teaching us to come back to school and take a test on it. We are basically being set up for failure.

Pro- I can sleep in on virtual days      Cons- It's hard to focus at home and it's hard to know if I turned some assignments in because some are on paper while others are online.  
 you don't have to wake up early everyday, I think that is bad because you can't see your friends a lot and you can't ask teachers for help as much, and my internet isn't the best so it doesn't work.

"it's good

"Pros- I have more independence, I can get ahead in my classes, and students with jobs aren't as stressed.

Cons- I can't really ask questions right away, but the teachers are really good at getting back to me quickly. "

"pros: don't have to wake up everyday, nice long weekend.

cons: dont see all my friends, hard to do online work"

The pros is that there is more time to study than usual because the teachers do not see us everyday, but the cons is that when I am doing repetitive work I may be doing it wrong and if I am then I did my whole assignment wrong and it would be extremely difficult for me to learn the "correct" way before the test which is usually the first or second day that Team B gets back to school after a long weekend. It is also hard because team B just had the whole week off and was trying to teach themselves the lesson and we come back to taking a test on something that we taught ourselves.

"Pros non Cons takes awhile to respond to questions,harder to find assignments  
"

Pros-non cons-teachers donâ€™t understand that we were off for 7 months. They are giving us an insane amount of work that I can barely keep up with. They donâ€™t understand that I have two sports leagues, a job, and seven other fricken classes. Take it easier on us for the love of god.

We can work at our own pace which is great, but Iâ€™d rather have a teacher in front of me teaching the lesson.

teachers don't have as much stress on them trying to make work for two diffrent groups of kids more time to work but no one to ask for help

"Con- signing in at 10 am  
pro- we get 2-3 days off

Pro- i like virtual"

pros- More sleep resulting in higher energy levels to complete tasks given. Less stress levels for teens. Makes me feel safer at school and I get more help because of less students.

No motivation to do online since its more work than I get in class or at home on non school days
