

**What would you like the school board or administration to know about the current situation as it relates to the pandemic?
(FULL SCHEDULE)**

Nothing

I think it is helping as we haven't had any cases at our school.

nothing

IDK

Let's just go back full time.

For our little town specifically, we are not being affected as much. Some schools in the larger cities are being affected more because they are around different people all of the time, while we are around the same people constantly. If we continue to take the precautions we are now, I see no reason to not go back to full time in school learning.

Only 400 people under the age of 24 have died from coronavirus in the US.

We should not fear covid-19. Covid-19 is almost like the flu or common cold. please let us return to a 5 day schedule. Please lift the masks as it has no effect on the spread.

it makes learning for some people a bit easier, and it lets students have a nice break from having to wear masks all the time

That the school should go back full time

Yes, there are people in the school with underlying conditions, but they have the option to stay virtual. It does not matter to me if we stay hybrid, go to fully online, or go to fully in school. Virtual learning is easy for me and I like it a lot. The only problem I would have if we go back to school is the fact that we are only allowed 5 chairs at a lunch table now. There would be more students with the same amount of room if we went back. I understand the guidelines say "socially distance wherever possible", but everyone knows many parents are still going to have issues with it.

The hybrid schedule is working, bringing people back full time could cause a major issue, and its probably not the safest option to try to rush into.

wait until flu season is over.

I'm ok

Most students want to go back full time

The president, the most secure and secluded person in our country got the virus what makes you think we won't

It's like someone moving From house to house between their grams, mom's, and dad's. It's not good for the kid because they're just a kid and it all seems like bad mental health for the kid.

We are around each other all day every day. But the school thinking they are taking precautions it doesn't really make sense. Kids are playing sports, etc... common sense.

if they assigned less work then the hybrid would be much better and kids grades wouldn't be as bad as they are right now.

Personally, I think that things need to get up and running again. People are going to get sick either way so we should come back full time without the masks and continue as normal.

If the school is doing fine right now with the hybrid and everyone is somewhat safe then we should continue to do this until at least January 1st like most schools

I know I'm not alone when I say I can't focus at home. I need the structure of school to get me through my day. Personally, I know I can get work done in 10 minutes if I really focused, so I just push it off till later.

ldk

masks aren't doing much for us and they are just uncomfortable

These restrictions don't make me feel any more safe and is affecting my school grades, which is something that will be determining my future jobs.

Online school is hard for me to do its hard to keep up especially when I don't have anyone to tell me to do my assignments

it is very hard to do the online every day I wish that many one of our online days would be an off day like wends day school could be closed for cleaning and student could get a day off

I would like you to know that it is too soon to go back to normal school being as close as we are to Penn state with all of the cases along with Altoona and everywhere else. It's dangerous and some people don't wear their masks right with all of us in here it makes it way more dangerous. We would lose multiple teachers because of the normal schedule. Teachers and students are scared of them or a loved one getting the virus.

Hybrid isn't the best choice because im not learning well. And my grades are dropping.

please shut down the school this is just going to kill Tyrone if you keep the school open please for the love of god close the school.

we're not getting our full education teachers take their masks off when its not a mask break and keep it off for about 30 minutes or so teachers forget our mask breaks and the mask break should be 13 minutes instead of 10

I do not feel safe to return to school full time.

I would like the school board to know that students grades and GPA's are suffering many students feel that we don't get out full education with this schedule again students at home sit in front of chrome books 8-10-11 hours working on work from the time they get up to the time their eyes shut because they are so tired many students sit wresting with math questions and continue to wrestle with these questions and many use a site that makes you sit on one question until you get it right but never guides you through why it's wrong you sit with a dot staring back at you from your computer. and until you do it the "right" way you still come face to face with problems a math site that does not guide you and teach you what you are doing wrong. this schedule has become very stressful on the teachers I will keep this teacher anonymous "teaching two times, repeating the same information over and over, again and again, is quite tiring" this is not fair to the teachers they spend more talking about the same lessons over and over again in the same week than being able to start one lesson one day, and end that lesson the same day and start a new lesson the next. (if you would really want to sanitize the and reduce the risk of the spread please look into the possible investment of PDI Medical grade wipes these wipes are the strongest wipes that kill viruses and bacteria, but there is a shortage at the moment, but hopefully, when everything gets back up and running there will be a surplus these wipes kill germs in 4 minutes. these should be in the classroom for the teachers.) and if teachers are to wear face shields they should be worn the correct way with the whole shield covering their faces I was walking long distance from one class to another I put my mask down to catch my breath and a teacher walking down the hall looked at me and said "You need to put your make up" when this teacher does not even wear the face shield correctly and does not follow the proper precaution to wearing the face shield, there are so many teachers who follow the procedure and then there are a few who do not follow the procedure. Thank you for giving students the opportunity to speak their feelings and opinions about the current situation.

I like the Hybrid schedule and it gives more sleep and I'm not sleeping in class

I hope that the administration sees the danger in this virus and does what's best for the community. I am fully aware that they cannot make everyone happy, but I believe that the hybrid schedule is working very well to possibly slow the spread in a controlled manner. I obviously do not know what the teachers are going through with the altered schedule, so I understand if the

normal schedule might put them through a lot less stress. I feel as though my decision on this matter is partly up to the Eagle Eye staff and whether or not they put a few administrative standpoints to support the normal schedule in their writing. This would be very helpful to me because I care what my teachers are going through, and making it harder on them is something that I have pondered on for an extended time throughout this schedule. Thank you so much for letting me freely express my opinion on this form without having to worry about the judgment that goes along with submitting my name. It has been on my mind and it feels amazing to be able to put my words to good use! I hope this helps!!! :-)

nothing, I trust they know all there is to know

As students, we aren't safe from each other, especially when we have mask breaks and people who just don't wear masks

N/A

I have no opinion

It's very confusing at times with online and like days your suppose to go but it won't matter

I'd prefer if we go back no masks

That hybrid schedule is working for those who give a good effort. And I feel like people not doing their work isn't the schedule's fault, its the person who should be doing the work.

Keep the hybrid schedule if you really care about the safety of YOUR staff and students. Health and safety is way more important than grades and making money.

We should not go back full time there was just a case in the elementary School

N/A

it's very difficult to learn material when half of it isn't even being taught and we are moving through lessons too fast. if there was 5 day weeks we could slow it down to be able to actually receive information.

As of right now you're not doing a lot to help. Focus more on the important things also how the students and teachers feel about this because I know there's a lot of people who don't feel safe, are worried about their family members, and just themself in general

No matter what the school does, kids really do not care to wear masks, and won't do so in the community. We simply don't live in a big community, and people don't believe in them. You can only control what happens in the school, not out of it.

We must wear our masks the correct way. It is a vital point to beating the Coronavirus and finally coming going back to full in-person. If we happen to go back now, I believe we have to wear them. For the safety of all.

It is vital to our development and mental health that we remain in the classroom- even if that means staying on a hybrid schedule. We need to have as much face to face instruction as safely possible.

I wish the administration and school board would put politics aside. This is nothing more than a health concern. Students want a year as normal as possible, but we also want to stay healthy and safe. In the beginning of the school year, Tyrone made the best possible mixed decision to try to account for everyone's wants and needs. The hybrid schedule is the most practical and necessary solution. It is giving us some in-person instruction and socialization, but it is also keeping us and our families as safe as we can be. Don't make a decision based on your political affiliation, make your decision based on what is the safest for the students involved.

Hybrid scheduling is a great tool to keep students in class safely. I know that kids are not doing great because they cannot learn online, but this is just like college is. We are doing just like what Penn State is doing right now. If you cant learn now, when you will have to PAY thousands to go to school, then you are more likely to fail and lose out on your money. I think the hybrid schedule is helping students learn how to teach themselves school like college kids are doing and it will prepare them for the real world during COVID-19 times.

Something needs to change. I hear rumors of teachers quitting because of the decision to go full-time, this ruins the morale of students when they see/hear their PAID teachers quitting. We can't quit, we aren't getting paid, and we're all in danger of getting the virus. Teachers, as much as they're trying to help us out through the pandemic, just aren't. We are all struggling and having tests every single day (in person, of course) on stuff we are barely getting taught in class just adds to the struggle.

We already have cases in the district. If we go back full time, it will be easier for COVID to spread and we may end up having a full outbreak. Also, there are a lot of students who have family and friends with preexisting health conditions that could cause COVID to kill them.

Nothing

Everyone understands there is a pandemic going on. We need to be safe, but we can't stop kids from getting a real education because they could potentially contract an illness that they statistically survive. Everyone just needs to use their common sense and follow standard procedures like face masks, temperature checks, and frequent hand washing. Students immune systems are stronger than ever right now. Think about it, they eat an drink after each other, they even pass around vapes from one kids mouth to the next. The students already have each other's germs. They hang out in their days off which is why most kids aren't doing their

work. A majority of the kids that are doing their work are cheating because in online school no one is going to know if they actually did their work or not. I really don't want to spend my last year with all my classmates stuck at home.

Nothing has changed with the severity of cases since school started, we even have a case in the district now, so why risk the chance of any more students contracting it.

N/A

WE CAN'T BREATHE IN THESE MASKS

no

I just think they need to take into consideration that the elementary school has a case and they got full time

Seeing that the elementary has a case and they are full time we should not go full time because that could happen to us

Officials say we are about to peak again between Nov-Dec, and if that is true and we really want to send everyone back full-time, I feel we should wait until after Christmas vacation. I think it would be easier to transition after the long break and hopefully the peak will have died down from then.

All I have to say is, the school district is going to make the numbers of the virus in this town SKYROCKET. All because they're concerned about kids' grades. Maybe worry about human beings LIVES rather than the poor choices some students are making all because they're lazy and won't do their work. Point blank PERIOD.

You're doing your best and thanks :)

I would like the school board to have all of the students to go online school to stay safe and not get the covid-19 because it will kill you if you will get it.

Don't put us in full time it will cause so much stress and make parents concerned even more Right now is not a good time to go back if we are to go back full time.

I say let's hold on until spring to go back to full week of learning because why go back during fall/winter season that's the flu season people are going to be getting sick very easily so I say wait until spring to go back full week.

Its way over dramatic and mask are unnecessary

I like hybrid more than full time learning

Dont gamble on the "if" . If there is a chance for anyone to develop COVID-19 who is immuno-compromised, why take that risk? Are you willing to deal with the consequences of their possible infection + or death? When this happens will you pretend that you didn't know? Or that it was the students responsibility to inform the school that they are compromised? How will you address the impending infections? How will you stop it from spreading from student to student? If a student contracts COVID-19, will everyone be quarantined? I understand it is not easy, but do what is smart + safer FOR ALL.

Going back full time is not a smart decision. As students, we may not be as prone to it but that doesn't mean that we have people we come home to who aren't, and teachers as well. People around here clearly have it seeing as a kid recently tested positive, a rumor is floating that another kid has it but hasn't told the school, and we are surrounded by places with plenty of cases. You're elevating the chances that we, your students whom you should care more about our safety than our education currently, could get this and bring it home to our parents and grandparents. This shows me more than anything ever before that the board simply doesn't care about us.

Grades have been dropping because of the hybrid schedule some kids can't physically learn from home. It would be more beneficial and safer to resume the normal five day weeks we used to have.

As I'm sure they're already aware, the health and safety of students and faculty should always be the top priority. If we go back to full time school, we risk the chances of a possible outbreak. Learning cant be done if we are in a hospital bed with covid. To anyone who believes it is okay to risk this because "we are young and our chances of infection are less," think of all the others who come to the school building every day. Teachers do not have a choice of whether or not they are full time or hybrid. Increasing the risk of the staff who make our school run everyday is extremely inconsiderate. Bringing kids back full-time raises the risk for the staff who are already high risk. It raises the risk for people who are not young and more likely to get infected. They come to school everyday and try their best to educate the students with the time they have. I have had many teachers plead with us to keep our masks on because they are extremely high risk and are afraid to get infected. However, they still have to come to school so they can have a job and their pay check to live. The teachers for the younger students still have to put on a smiling face for the kids even though they are increasingly worried for their health. Please keep all of the faculty who come to school everyday and give their all to help the students and our community. The school couldn't run without them after all.

A lot of kids are under stress right now and you really don't know what life is like until you're in the classroom yourself. Also a lot of kids had to take on rules to help their family

through these trouble times. Some kids have to watch their siblings more because their parents have to work more. Other kids of had to get jobs to help their family pay for bills. So the hybrid schedule may be better for some kids to work around. And I feel like there should be more mental health checks happening. This is a really stressful time and everyone is dealing with a differently.

With everyone coming back to a regular schedule will we be able to participate in school dances and events?

Going full time will benefit my wellbeing

When most students leave school they go hang out with their friends without masks anyway. We need to keep sports going no matter what as I and others are relying on their athletics to pay for college

That the hybrid should stay but mask should go.

Half days for 5 days : group a in the morning and group b the other half

With only half of the students at school we are still having people who don't wear masks correctly. There should be more enforcement on the mask rules rather than just them being a dress code violation

Um...i dont know

NA

That online work is terrible and shouldn't be a thin mg for students who struggle in school I would like the school board to know that I feel we are not being thoroughly informed about the ongoing situation and positive cases in the school district. I feel that the school administration should do a better job communicating to the students and parents about the positive cases and ongoing situation. I also would like to let you know that teachers are not properly, if at all, cleaning desks and supplies between classes. I would like to continue to go to school because I am not overly fond of the hybrid schedule, although there are a few things that need to be done better in order to keep students, faculty, and families safe.

The elementary student who got COVID caused 3 teachers to be quarantined. Image what would happen if 1 high school or middle school student got it. Is going back to full time really worth putting our irreplaceable teachers at risk?

Cases in central Pa are low and it doesn't harm the student age group that much. The lower grade level doesn't do the hybrid, but they are more susceptible so the highschool and middle school should rid themselves of it.

That as a student taking a lot of college classes, I can't afford to not be in school everyday because if I'm not I have little motivation.

We know these decisions aren't easy, thank you for doing your best

Members of your own staff are afraid of full student return. Many due to their own health or the health of family members. So many students have immuno compromised parents, or even themselves are compromised. Yes, it's going to make some parents more compliant, but what about the health of the student body?

More than 70% of people are asymptomatic, that doesn't mean it's not deadly. Just because we haven't had many reported cases means we are safe enough to go back full time.

Stop thinking about just a few failing students and should have more options with online learning. If certain kids are failing make them come into school every day not every student at Tyrone.

First off it is not a pandemic so stop calling it one.

Nothing

there are already kids sick in the elementary school i don't see why we are opening up already right after somebody gets sick?

It'll go away soon enough, and by that I mean after November 3rd

Why in the world would we change to a five day schedule if there are cases in the district, it is foolish and the students who are struggling academically with the hybrid schedule is due to pure laziness and are also the people that believe that COVID is not a big deal. It is a global pandemic!

don't bring us back full time

that the school isn't really taking 100% precautions. the desks are not sanitary if e return to 5 days a week. and that students should have a choice o do hybrid,5-day, and fully online. I feel like it should be a choice for the students that either want 5-day or would like t say in hybrid. (yes attendance would be funky but I feel like it should be a choice not a requirement.)

They are all stupid to vote to go back full time and put all students at risk. They should be ashamed of their decisions and until there is a major breakthrough in the fight against COVID-19, to never restate such a terrible idea ever again.

its all a joke but we all know if we do go back full time the whole town of Tyrone pa will be lashing out on the school because we sadly live in a world full of snowflakes

hybrid is safer and there is less people at the school at one time.

We need to just let miss rona run her course and survival of the fittest will do its job. School is just a joke right now because every student is cheating. Then have to go take a test they are going to fail because they weren't taught by the teacher. Every student is just sitting at home being surrounded by better things to do than school work.

N/A

peoples parents have tested positive

I don't think they should be focusing on our education more than our safety. A majority of the kids who struggle/struggled online were the ones that don't care about school in the first place. While our education is crucial, I don't think mine is being compromised whatsoever. Therefore, I don't think we should take advantage of the hybrid schedule. We are able to see our teachers, learn in person, etc all while remaining safe. Returning full time would only worsen the situation. I understand the desire to return to normal, but that is unrealistic. We are amongst a pandemic, and many of us know someone with a compromised immune system or we even have a compromised immune system ourselves. We should be prioritizing our safety. We come in contact with tons of people every day, and I think the safety of them and ourselves is more important than turning in assignments.

I would like the administration to know that students like me can not learn while staring at a screen all day and trying to teach themselves and that is why I need to be back in school and let the students that would rather do hybrid/ online do that instead. I wish I was given a choice on how I learn instead of being set up to struggle and worry about doing my work correctly.
Its not covid 20

Listen to the kids attending the school, not the parents.

If you send us back full time it will make things worse for students most of us have just got adjusted to the new hybrid schedule and now our schedule is getting flipped again
its flew sesean so not all sintoms will mean its covid

We have seen what happens when we go full time in the elementary school and positive tests have already occurred. So why would it be a good idea to go back now?

I don't care just want a regular schedule, it will help my grades
